PROJECTS

Brainwave 🔗
Vite , React , Tailwind

📅 February 2024

- Stunning frontend UI designs featuring captivating parallax effects and sleek bento box layouts.
- Modern UI/UX website, developed using React.js and Tailwind CSS, exemplifies modern UI/UX principles. Its sleek design, seamless animations, and overall user experience set a high standard, serving as a reference or inspiration for future modern applications or websites in general.

File-Sharing MERN app 🔗
REACT Based - Full Stack

📅 December 2023

- A MERN stack file sharing app that provides a shareable link to download any uploaded files. Uses the multer module to handle file uploads

Hospital Management MERN app 🔗
React, MongoDB - Full Stack

📅 September 2023

- A completely working project based on a Hospital Management System **NodeJS** with **MongoDB**.
- The **NodeJS** project below has crucial elements that first- and second-year IT students may utilize for their hospital assignments.
- It comes with a lot of useful features that enable users to keep track of their healthcare data, transactions, and more.
- This system, as well as the web application, has a clear idea that is similar to real-life circumstances and well- implemented.
